PROFESSIONAL SUMMARY

Front-end product professional with 7+ years building user-centered web applications from conception to deployment. Expert at bridging design and engineering to deliver high-performance, accessible solutions. Proven ability to work with cross-functional teams, drive product decisions, and ship features that impact thousands of users.

KEY ACHIEVEMENTS

- Built and launched a dashboard webapp for JPMorgan Chase, serving over 7000 advertisers and allowing them to reach 80M+ Chase cardholders via card-linked offer campaigns.
 - Built advanced marketing and graphics features for a B2C real-money gaming platform
 - Led web design for Chicago magazine and administered the CMS and web properties
 - Redesigned Chicago magazine's subscription conversion flow resulting in a 20% increase in digital subscription acquisitions
-

WORK EXPERIENCE

JPMorgan Chase (formerly Figg, Inc., acquired by JPMorgan Chase in July 2022)

Senior Frontend Software Engineer

Remote / 2022 - 2025

- Lead front-end development for Chase Media Solutions Performance Dashboard, an analytics platform enabling marketers to reach 80M+ Chase customers through targeted card-linked offers
- Architect performant, accessible React and Vue components, using D3.js to handle near-real-time data visualization for 8000+ campaigns
- Collaborate with designers and product to drive product improvements through user research and data analysis, successfully proposing and implementing UX enhancements that improved dashboard usability
- Champion accessibility standards, achieving WCAG 2.1 AA compliance and a 100% Lighthouse score across all dashboard features
- Work with a cross-functional team of 6 developers, one designer, and one product manager to deliver bi-weekly releases

- Gave visibility to users on their more than \$200M in budget delivery via 10K campaign report downloads
- Mentored other developers on Vue and React best practices, component architecture, and responsive design

High 5 Games | Web Developer

NYC/Remote | 2019 - 2022

- Developed React front-end for B2C real-money gaming platform (high5casino.com) serving thousands of daily active users across 200+ slot games
- Built a promotional display system with CSS Grid, reducing banner load times by 50% and JS bundle size by 20% while implementing advanced display features like parallax scrolling, layers, and SVG animations
- Implemented responsive, mobile-first designs supporting many device types and screen resolutions
- Localized the app with 6 different languages and ensured design implementations worked across all languages and locales
- Optimized performance through code splitting and lazy loading
- Integrated Bambora payment processing systems handling \$50K+ in monthly transactions

Fitch Ratings | Junior Software Engineer

Chicago, IL | 2018 - 2019

- Developed client-facing web applications providing financial ratings and analysis to investors globally
- Built interactive ratings portfolios using Vue.js and GraphQL
- Implemented Tailwind, improving and simplifying the developer experience

Chicago Magazine | Web Developer & Graphic Designer

Chicago, IL | 2017 - 2018

- Led complete redesign of subscription pages (Chicagomag.com), resulting in 20% increase in conversion rates
- Designed and developed responsive editorial features reaching 200K+ monthly viewers
- Created 20+ microsites for advertising clients to generate additional ad revenue
- Implemented Google Analytics tracking providing insights that shaped editorial strategy
- Produced multimedia content including video and interactive graphics for special features

Chicago Sun-Times / Splash | Multimedia Producer & Graphic Designer

Chicago, IL | 2012 - 2016

- Launched Splash as a part of a small team, a weekly lifestyle magazine distributed to 250K+ Chicago readers via the Chicago Sun-Times
- Led front-end development for digital edition on Wordpress, administrated hosting on Pantheon
- Attended and photographed major philanthropic events
- Contributed portrait photography for major features
- Designed marketing materials to increase event attendance
- Developed splash.suntimes.com using responsive design principles before mobile-first was standard
